Like I have mentioned before, most people (i.e. the people who just do what they are told by their employer, the government, or the narrative) do not know the law so they believe that vaccine and mask mandates can be enforced. However, this is not true. This is when you will have to push back and contact an attorney to get advice.

I hope this helps you because now is the time to stand up to this kind of injustice and draconian medical tyranny.
